

INTEGRATED MANAGEMENT SYSTEM POLICY

Concesión Vial de los Llanos S.A.S expresses its commitment to safety and health at work, environmental management for sustainable development, and the satisfaction of its stakeholders. Design, construction, operation and maintenance of roads are part of Malla Vial del Meta, which develops the following activities:

- Providing optimal levels of service in road operation.
- Attending to maintenance of road infrastructure in a timely manner.
- Assuring highly competent and talented personnel for the integral management of activities.
- Assigning resources and work environments necessary for development processes.
- Directing the performance processes and their context towards continuous improvement and control of operational risks.
- Preventing pollution, as well as protecting biodiversity and ecosystems.
- Managing activities for the protection of health, the promotion and prevention of accidents, incidents and occupational diseases.
- Identifying and eliminating hazards; assessing the risks and establishing the respective controls, to reduce the risks to OSH.
- Promoting collaborative consultation and participation.
- Managing compliance of legal and other requirements for all the stakeholders.
- Contributing to regional welfare and socio-economic development.
